

2023 Fuel Availability at UMC

(updated 7/13/23)

Fuel availability at UMC has been an issue this year, here is the current state of affairs:

- 91 octane is readily available at UMC, and at gas stations within a 30 minute round trip of the track.
- Other standard consumer gasoline and diesel are available within a 30 minute round trip
- UMC does **NOT** currently have access to unleaded race fuel for their pumps. This includes the 98 and 100 octane that they've had in the past.
- 110 leaded fuel has been available at UMC, but NASA Utah cannot guarantee the consistent availability of that fuel

PLEASE PLAN ACCORDINGLY

We are currently working with UMC to plan logistics so teams can have fuel delivered to UMC, and will update this document as soon as we have details.

If you are bringing fuel drums with you, please follow these rules:

- Drums must be labeled with team/driver name and car number
- Drums must be stored on cement, or if on asphalt must be placed on a pallet or plywood to minimize impact to surface
- Drums cannot block walkways or garages
- Drums cannot be placed in garages, and fueling cannot happen in garages
- Drums should be shaded from direct sunlight
- Drums and other containers must be removed from UMC at the end of event. If they are left you will be charged \$150 per drum for disposal.

These are contacts for fuel that may be able to provide cans or drums of fuel. PLEASE plan in advance if you need fuel.

- Race Shops that will be on-site during NASA Utah events
 - Riot Race Shop: Alex - alex@weareriot.com 801-201-1789
 - Air Power Racing: Brandon – brandon@airpowerracing.com 720-2362491
- Christensen Oil, Provo Ut. 801-373-7970
- Sunoco: <https://www.sunoco.com/racing>
- VP TEXAS Region: Elmendorf, Tx. T: 210-791-8260
Email: vphq@vpracingfuels.com
- VP WEST Region: Murrieta, CA. T: 951-457-6211
Email: vppacific@vpracingfuels.com
